

OCWA Posting – January 2024

Staff, Project or Senior Civil Engineers or Geotechnical Engineers

Description

Staff Engineers for Geotechnical Engineering for water, flood control and other infrastructure projects, including dams, levees, spillways, outlet works, watersheds, channels, pipelines, retaining structures and other facilities. Openings are currently available at the Irvine, California Headquarters in Southern California and at the Sacramento, California Branch Office. Openings are also anticipated in the other branch offices located in San Diego, CA; Phoenix, AZ; Lakewood, CO; and other future branch offices. Projects will be located in California, Arizona, Nevada, Colorado, Texas, Hawaii, other states and in U.S. Territories, including Guam, Federated States of Micronesia, and Puerto Rico. GENTERRA is an engineering consulting firm providing civil engineering, geotechnical engineering, hydraulic and hydrologic engineering, water resources engineering, structural engineering, and other engineering and geoscience disciplines. Submit resumes in confidence by e-mail to GCjobs@genterra.com Attention: Joseph J. Kulikowski, P.E., G.E. The physical and postal address is GENTERRA Consultants, Inc., 15375 Barranca Pkwy., Bldg. L, Irvine, CA 92618. The company web site is at <http://www.genterra.com>.

Requirements

There are immediate and near-term openings for candidates for Staff Engineer at entry level as well as those with some experience in Geotechnical Engineering. Preference for the Staff Engineer position is for candidates with an MS Degree in Geotechnical Engineering from a recognized college or university with a strong reputation for Geotechnical Engineering. A PE License is not required for the Staff Engineer position, but an EIT is preferred. Experience is preferred, but not mandatory, in the analysis, design, evaluation, inspection, assessment, construction and rehabilitation of dams, levees and other water retaining structures, watersheds, flood control and wastewater facilities in the United States and U.S. Territories, including earth, rockfill, concrete and roller compacted concrete (RCC) structures, levees, pipelines, channels, hydraulic structures, spillways, reservoir outlet works, pump stations, lift stations and coastal projects. Requirements also include strong computer skills, experience using SharePoint and/or other collaboration and document exchange programs, excellent communications and writing skills, and evidence of success in working well with other staff and clients as part of a responsive, technical and professional team.

Company Information

GENTERRA Consultants, Inc. is a consulting civil and geotechnical engineering firm specializing in the design, evaluation and rehabilitation of dams, reservoirs, levees watersheds, and other water storage, flood management and conveyance facilities, and in engineering for the design and construction of civil works and watershed rehabilitation for federal agencies. The firm was established in 1995, with the main office in Irvine, California and branch offices at other locations in Southern and Northern California, Arizona, Colorado, and Pennsylvania. Locations are being planned for other States. Projects are located nationwide, including the continental U.S. and U.S. Territories. The firm has over 30 employees, is growing, and is able to handle

larger projects by teaming either as a prime consultant or a subconsultant with other engineering firms. Clients include water, flood control and irrigation districts; Federal, state and local government agencies; The U.S. Army Corps of Engineers (USACE), Natural Resources Conservation Service (NRCS), U. S. Forest Service (USFS), U.S. Fish & Wildlife Service (USFWS), and other Federal agencies; other engineering and consulting firms; utilities; legal firms and other sectors.
