

OCWA Posting – April 2019

GENTERRA Consultants, Inc.

Staff, Project or Senior Civil Engineers or Geotechnical Engineers

Description

Staff, Project or Senior Civil Engineers or Geotechnical Engineers for water, flood control and other infrastructure projects, including dams, levees, spillways, outlet works, channels, pipelines, retaining structures and other facilities, such as Advanced Pumped Storage Projects and coastal facilities. Projects will be located in California and in other states. Office location would be in either the Irvine, California headquarters office in southern California; or in the Austin, Texas Branch Office; or in the Sacramento Branch office in northern California. There are also upcoming openings in other States while working from home and from one of the company's other Branch offices in Tempe, Arizona; Harrisburg, Pennsylvania, or planned offices other states, depending on the candidate's current location and preference. All locations will be considered. GENTERRA is an engineering consulting firm providing civil engineering, geotechnical engineering, water resources engineering, structural engineering, coastal engineering and other engineering and geoscience disciplines. The firm specializes in the design, evaluation and rehabilitation of dams, levees, water storage, civil works projects, and other water and flood control and flood reduction facilities, such as dikes, flood walls, channels, pipelines and pump stations.

The company web site is at <http://www.genterra.com>. Submit resumes in confidence by E-Mail to cejob3@genterra.com or Mail to Joseph J. Kulikowski, PE, GE, GENTERRA Consultants, Inc., 15375 Barranca Pkwy., Bldg. L, Irvine, CA 92618.

Requirements

There are several immediate and near-term openings for the following levels: Staff Engineer with a minimum 2 years of hands-on experience; Staff Engineer with an MS degree or PhD in geotechnical engineering from a recognized college or university with a strong reputation; Project Civil Engineer or Geotechnical Engineer with a P.E. from any State and a minimum 5 years of hands-on experience; or Senior Civil Engineer, Geotechnical Engineer or Structural Engineer with a P.E. from any State and a minimum 10 years of hands-on experience in engineering and project management. Specialized experience is preferred in one or more of the following

fields: civil engineering, geotechnical engineering, hydrology, hydraulics, structural engineering, coastal engineering, geological engineering, construction engineering, and project management. Projects would include the design, evaluation, inspection, assessment, construction and rehabilitation of dams, levees and other water retaining structures, flood control and wastewater facilities in the United States, including earth, rockfill, concrete and roller compacted concrete (RCC) structures, levees, pipelines, channels, hydraulic structures, spillways, reservoir outlet works, pump stations, and coastal projects such as sedimentation studies, breakwaters and jetties. A Master's Degree or higher is preferred for all positions, but a lesser degree will be considered based on experience and location. Requirements also include strong computer skills, hands-on experience using SharePoint and/or other collaboration and document exchange programs, good communications and writing skills, and evidence of success in working well with other staff and clients as part of a responsive, technical and professional team.

Company Information

GENTERRA Consultants, Inc. is a consulting civil and geotechnical engineering firm specializing in the design, evaluation and rehabilitation of dams, reservoirs, levees and other water storage, flood management and conveyance facilities, and in engineering for the design and construction of civil works for federal agencies. The firm was established in 1995, with the main office in Irvine, California and branch offices at other locations in California, Texas, Arizona and Pennsylvania. Locations are being planned for other States. Projects are located in California and in other States. The firm has 30 employees, is growing, and is able to handle larger projects by teaming either as prime consultant or a subconsultant with other engineering firms. Clients include water, flood control and irrigation districts; Federal, State and local government agencies; The U.S. Army Corps of Engineers, NRCS, DOJ, USIBWC, and other Federal agencies; other engineering and consulting firms; lake owner associations; utilities; legal firms and other sectors.
